

## Abstract of the disclosure

### Surfactant/solvent systems

5 The present invention relates to surfactant/solvent systems for liquid formulations comprising

- $\alpha$ ) one or more nonaromatic-based surfactants,
- $\beta$ ) as solvent, one or more triester(s) of phosphoric acid with alcohols, preferably from the group consisting of

- 10 1) monohydric alkanols having 5 to 22 carbon atoms, for example with n-, i- or neo-pentanol, n-hexanol, n-octanol, 2-ethylhexanol,
- 2) diols or polyols, such as ethylene glycol, propylene glycol or glycerol,
- 3) aryl, alkylaryl, poly(alkyl)aryl and poly(arylalkyl)aryl alcohols, for example with phenol and/or cresol, octylphenol, nonylphenol, triisobutylphenol,
- 15 tristyrylphenol,
- 4) alkoxyated alcohols obtained by reacting the alcohols mentioned above under 1), 2) or 3) with alkylene oxides, preferably (C<sub>1</sub>-C<sub>4</sub>)alkylene oxides, and
- 5) alkoxyated alcohols obtained by reacting monohydric alkanols having 1
- 20 to 4 carbon atoms and alkylene oxides.

The surfactant/solvent system according to the invention is suitable for the preparation of liquid active substance formulations.
